CONNECTED SMART MOBILITY

Make your trips easier !

Who are we ?

MobilePlug was created in 2014, with the purpose of offering a global solution to protect and charge e-bikes. A concept also compatible with e-scooters.

MobilePlug is a french-based compagny, located in La Ciotat (013). In 2018, the MobilePlug team is composed of 9 passionate and versatile persons.

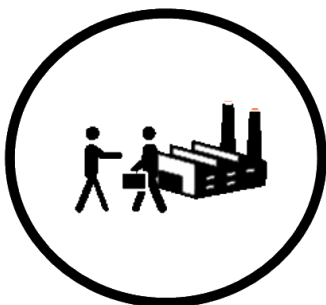

Bike&Plug solution

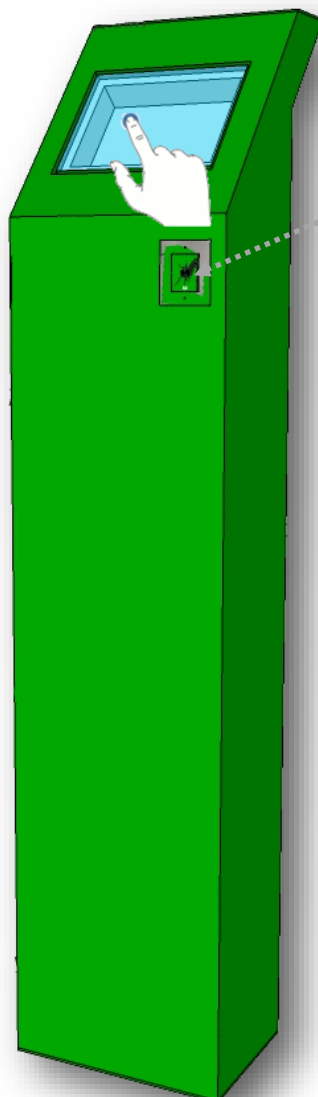

MADE IN FRANCE

Solution ONE

Subscriber's
version

Private fleet designed

RFID reader allowing access

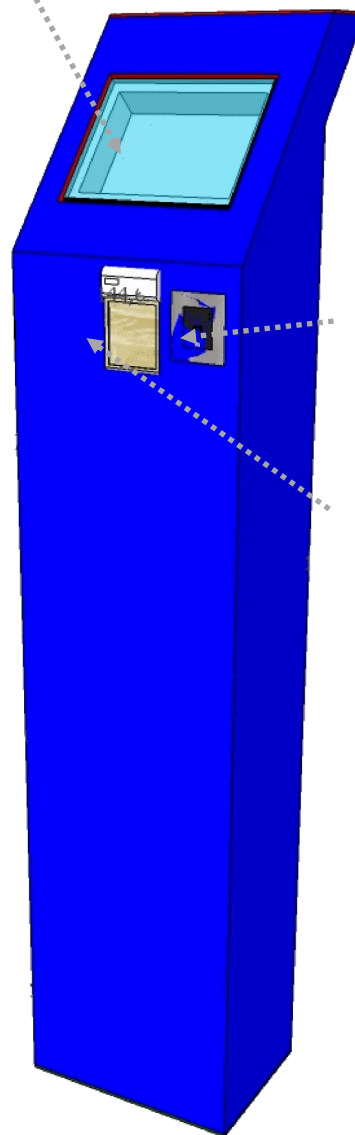

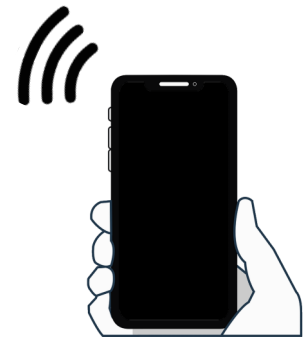

Smart terminal

*MobilePlug recommends
Trottix's e-scooters for an
optimal use and charge*

Trottix

Touchscreen

RFID reader

Credit card reader

Solution TWIN

Subscriber's version

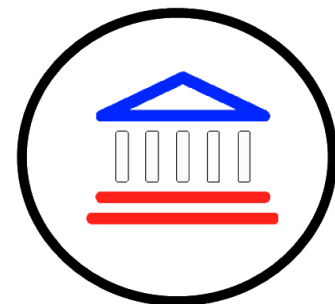

Self-service

Smart terminal

MobilePlug recommends
*Néomouv's e-bikes for an optimal
use and charge*

néomouv

Complete solution

This **TWIN solution** is a toursim's offer, designed for municipalities or operating companies.

This solution includes a subscriber's version and a self service's one, wich make a significantly easier and more flexible use.

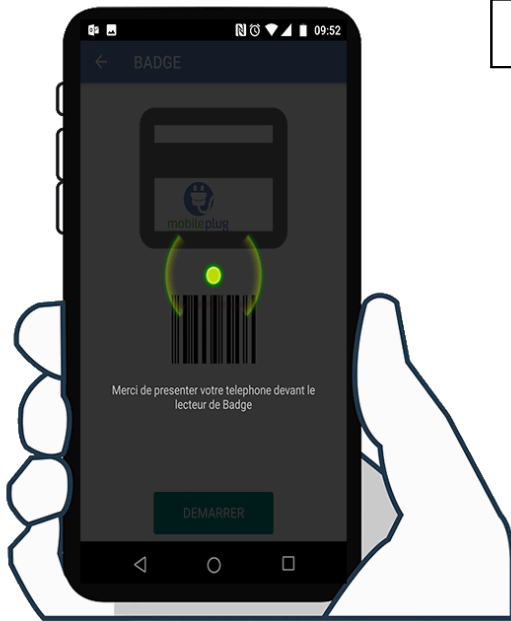

The smart terminal RFID system allows access to the user by contactless credit card, a subscription card like Navigo, Transpass,... and also by NFC smartphone.

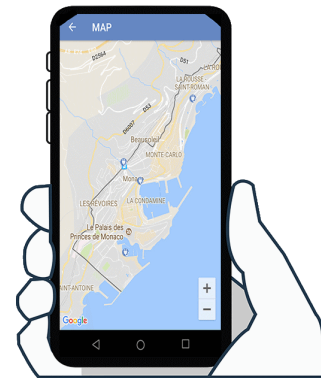

Applications

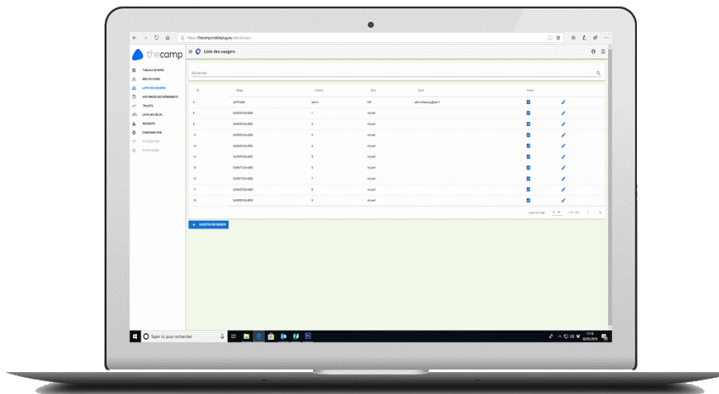

SMARTPHONE

- Access through **NFC** technology
- Geolocation reference
- Display the available e-bikes & e-scooters

WEB

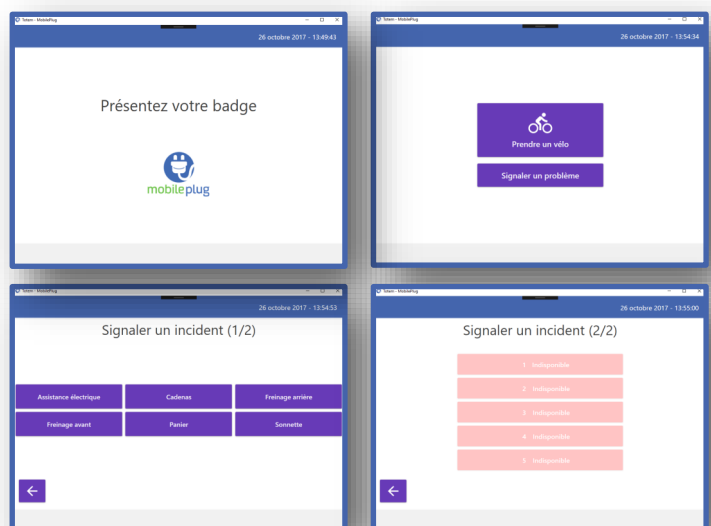

Web interface allows data management and supervision :

Terminals, users and e-bikes lists - Track and trace

TERMINAL

Allows to :

- Take in / drop off a e-bikes or e-scooters
- Choose your e-bikes and/or e-scooters
- See charge levels
- Follow up the incident report

Installation  theCamp at Aix en Provence (13) - 2018 January

Why choose MobilePlug ?

6 good reasons to choose MobilePlug when setting up and managing a fleet

Optimal security

Electromagnetic locking system from the universal connector to the safety module

Scalable

Customizable and scalable web and client application software

Connector

Quick and simple installation (less than 3 minutes to assemble)

Universal

Patented connector for all types of two-wheeled vehicles *

Profitable

Transparent and calculable costs (installlation, operation, maintenance, automated management)

Ecological

Low impact and sustainable mobility solution

* Rated voltage less than 48 volts

How its works ?

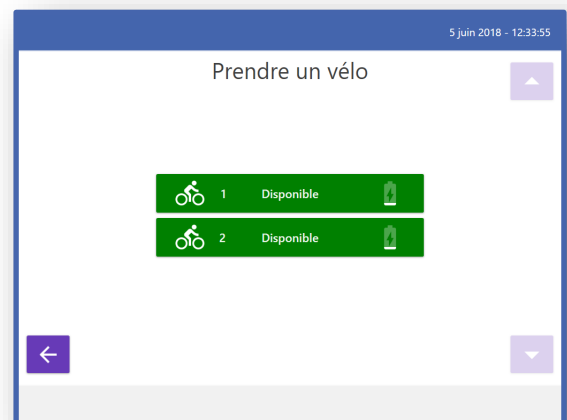

STEP 1 : ACCESS

Badge will bring you to the touchscreen of the terminal.

STEP 2 : CHOOSE YOUR E-BIKE

Choose your e-bike or your e-scooter from the screen and follow the instructions.

STEP 3 : TAKE IN YOUR E-BIKE

You have from now on, 30 seconds to get your e-bike or your e-scooter.

STEP 4 : TAKE ADVANTAGE OF IT WHEREVER

Your e-bike has a 70 km autonomy for your future stroll.

TROTTIX's e-scooters as for them, have a 25 km autonomy.

STEP 5 : DROP OFF YOUR E-BIKE

Drop off your e-bike or your e-scooter.

They are locked, secured and in charge.

MobilePlug's services

MobilePlug is not just a supplier of a material and software solution.

MobilePlug is also a structure by your side to help you understand, to conceive and to realize your **Bike&Plug** project.

MobilePlug can accompany you in a very operational way on:

- " *Upstream expertises* " allowing to define the adequate service. MobilePlug is a team of technicians, specialised in the electromobility for more than 10 years.
- The *conduct of the project*, from planning to launch, via the trainings essential for the good control of the key stages (stations installation, handling of the softwares, servicing and maintenance, communication and marketing)
- The *after-sales service* for the order of spare parts but also "expertises" allowing to follow, accompany and develop the project on the technical or commercial plan during each year of its functioning. MobilePlug integrates completely the requirement to develop its solution for an optimal satisfaction of the city or the urban area, and the owner, because our real objective is the comfort of the final user.

From design to realization, MobilePlug surrounded itself with well-know industrial partners. From pre-visit to pass of the construction site lead, MobilePlug is by your side. The installation of the Bike&Plug solution is always overseen by MobilePlug.
